

# Volcano Notes Part I

follow the link ([Click here to learn more about volcanoes](#)) and take notes in your ISN on the four different types of volcanoes:

cinder

shield

strato

caldera

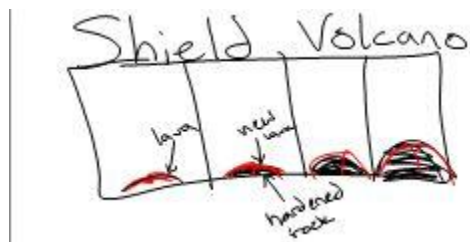

(these notes should be the next open left-hand side)

your notes should have:

- a small picture of the volcano type
- brief explanation of any key words

## Part II

On the **right side** next to your Part I notes, you will be drawing and coloring an example of each volcano type's creation process in 4 steps.

[diagrams & info of 3 volcano types + Caldera info](#)

Under each volcano, list the following:

- 2 real life examples of this volcano type and where they are found
- types of rock associated with the volcano type

[Quiz yourself if you are done with your notes](#) (please turn off volume first!)
